

Dear QTS Customers,

Due to ongoing delays at TUV-SUD, Quality Tech Services has not yet received our official ISO 13485 recertification certificate. We understand that this delay impacts the supplier control requirements that you verify QTS's certification status.

We completed our recertification audit January 7<sup>th</sup> – January 10<sup>th</sup> and received a DRAFT version of the certificate in Mid-February. After repeated requests for the updated certificate, it has been relayed that the delay is an internal TUV-SUD issue and there are no outstanding issues requiring QTS input. Multiple requests for an official letter from TUV-SUD to explain the delay have also provided no relief.

In the absence of the official certificate from TUV-SUD, or an official letter of status, we will post the DRAFT-Certificate received in February. When the official certificate arrives, we will post it to our website as quickly as possible.

We appreciate your patience in resolving this matter and look forward to our continued partnership.

If you have additional concerns or requests, please contact your customer service representative.

Kind Regards,

Brian D. Gaeth  
Director of Quality

Attachment: DRAFT ISO 13485 Certificate

# Certificate

No. Q8 066914
